This form is to be completed by a land surveyor, engineer, or architect who is authorized by state law to certify elevation information when the elevation information for zones A1-A30, AE, AH, A (with BFE), V1-V30, VE, and V (with BFE) is required. In the case of zone AO, the building official, the property owner, or the owner's representative should complete the information in Section I and may also complete the certification. Community officials who are authorized by local law or ordinance to provide floodplain management information may also complete this form.

SECTION I BUILDING ELEVATION INFORMATION

- Using the Flood Insurance Manual or the NFIP Flood Insurance Application—Part 2 Worksheet, indicate the proper diagram number and elevation of 6.36 feet NGVD. The top of the reference level floor from the selected diagram is at an elevation of _____ feet NGVD. (or other datum—see #5)
- FIRM Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal structural member of the reference level floor from the selected diagram is at an elevation of _____ feet NGVD. (or other datum—see #5).
- FIRM Zone AO. The floor used as the reference level from the selected diagram is feet above highest natural grade next to the building (also enter in line 8). This value must be equal to or greater than the AO Zone flood depth number listed below. If no flood depth number is available, is the building's lowest floor (or reference level) elevated in accordance with the community's floodplain management ordinances? Yes No Unknown
- Indicate the elevation datum system used in determining the above reference level elevations: NGVD Other (describe on back)
- Indicate the elevation datum system used on the FIRM for base flood elevations: NGVD Other (describe on back)
(ATTENTION: If the elevation datum used in measuring the elevations is different than that used on the FIRM, then the elevations provided must be converted to the datum system used on the FIRM.)
- Is the reference level based on actual construction? Yes No
* A "No" answer is only valid if the building does not have the reference level floor in place. Fill in the elevation based on construction drawings and do not complete question #8. If "No" is checked, this certification will be valid only for buildings in the course of construction. After construction of the reference level floor is completed, a post-construction elevation certificate will be required for continued flood insurance coverage.
- Provide the following measurements using the natural grade next to the building (round to the nearest foot).
 - The reference level is: feet above below (check one) the highest grade. feet above below (check one) the lowest grade.
 - The garage floor (if applicable) is: feet above below (check one) the highest grade. feet above below (check one) the lowest grade.
