**Question #1: Is the retiree population Medicare eligible and is there a necessity for Medicare D subsidy placement and reconciliation?**

The County provides pre- and post-Medicare postretirement benefits and hence the desire to understand your Med D capabilities.

**Question #2: The claims file repricing template and pharmacy disruption template are included for us to complete. However, I do not believe the claims file includes a column showing the copay/tier category, or a specialty/non-specialty designation.**

Correct, this data was not included as we are unable to share due to data agreements in place.

**Question #3: Would you be able to provide a claims file that contains this? Also, is there a copy of their current formulary?**

Currently, we are unable to share due to data agreements in place.

**Question #4 Do they currently utilize any sort of patient assistance plans, manufacturer assistance, copay programs, or alternative funding with the current carrier?**

As mentioned in the Rx template file, the following programs are in place in addition to the CVS mandatory maintenance mail program:

Specialty Guideline Management
Specialty High Dollar Review
Non-Specialty High Dollar Review
Opioid Management
UM, Step Therapy

**Question #5: If so, would you be able to provide relevant information?**

There are no other programs in place today.

**Question #6: We are reviewing the PBM RFP and wanted to see if there will be a medical RFP as well?**

No, the County is satisfied with their Medical TPA and is only reviewing PBM services at this time.

**Question #7: The claims file for the repricing doesn't include date of fill. Would you like us to use a recent date (ie. whatever date my analyst is able to run the reprice) or can an updated claims file with fill dates be provided?**

Yes, please use recent dates.

**Question #8: Additionally (if dates cannot be provided) can you tell me what timeframe those claims are from? It will help in providing accurate pricing guarantees if we know if this is, for instance, 12 months of data or 18 months.**

The data is for the 2020 calendar year (12 months).
