INSPECTED BY: _____ DATE: _____ PASSED FAILED

This electric service was inspected to determine conformance with the City of Union Building Code. The City of Union will not certify the above information. We do not certify other entities requirements.

To get a premise number from Ameren – Call 1 (800) 552-7583. Once you receive a premise number, this form needs to be **completely** filled out and returned to the City of Union Building Department or you can email it to dkossmann@unionmissouri.org. If the form does not have all the information filled out, Ameren will reject it. Once your electric service passes the inspection done by the City of Union, a sticker will be put on your meter box and we will notify Ameren that the service has passed by emailing them this form.
